

PARTICULARITIES IN EPILEPTOLOGY: PARTICULAR RESULTS OF PSYCHOLOGICAL TESTS ON TWO CASES OF EPILEPSY

A. Guen, C. Moret-Chalmin

Neurology, Neurophysiology, ICE Neurological Clinic, Chaville, France

clmoret@gmail.com

We report the influence of non specific neuropsychological tests, on two cases of epilepsy, grand mal idiopathic and complex partial symptomatic, by activating infra-electro-encephalographic, focal, nonorganic, epileptogenic area and amplifying focal secondary epileptogenic one, and we observe the seizure evolution for both cases.
