A comprehensive Congress fully devoted to clinical debates and controversial issues in a wide spectrum of neurological disorders

The 4th World Congress on Controversies in Neurology (CONy)
Barcelona, Spain, 28 - 31 October, 2010

Dear Friends,

Over the years, the field of neurology is undergoing enormous expansion in clinical and basic data, as well as that of field-related technology. Neurological diseases reach epidemiological dimensions and treatment possibilities have diversified markedly. These developments have created a need for debates on numerous issues in order to help reaching clinical conclusions.

The 4th World Congress on Controversies in Neurology (CONy) will serve as an exclusive forum for international experts to share and compare experiences, in order to outline appropriate treatment. A congress that focuses on clinical controversies is a new concept. It is embarked upon primarily to facilitate effective debate on unresolved clinical and therapeutic dilemmas, where evidence-based medicine data and opinions of leading experts will be discussed.

Ample time will be provided for discussion, and participants will have the advantage of conversing and debating unresolved issues with world authorities in their fields. The Congress aims at providing state-of-the-art data, thus allowing clinicians to reach reliable solutions.

We invite you to participate in the 4th World Congress on Controversies in Neurology (CONy).

We look forward to an exciting scientific event in the beautiful city of Barcelona.

Professor Amos Korczyn
