5th World Congress on Controversies in Neurology (CONy)
Beijing • China • October 13-16, 2011

Dear Friends and CONy Partners,

We are proud to announce that the **The 5th World Congress on Controversies in Neurology: Life Course Related Conditions (CONy) - Asia Pacific** will take place in Beijing, China, on October 13-16, 2011. The success of the previous CONy Congresses, which took place in Europe, paved the way for a locally oriented CONy Congress in the Far East.

Academically, CONy Congresses raise the most dynamic and controversial topics facing clinicians in the fields of neurology in an exciting debate forum. The Congress will promote excellence in the field by seeking to shed light on ongoing and challenging debates and to bridge gaps between the expansion of information and its consolidation in clinical practice. Allowing ample time for speaker-audience discussion, the Congress aims at reaching up-to-date and agreed-upon answers to ongoing debates even when data remains limited, through evidence-based data and expert opinion. Participants will have the opportunity to take part in this vibrant meeting which will facilitate discussions on the shared experiences and opinions of local and international experts and key opinion leaders. The CONy Congress will deal, as before, with global topics, but will try to emphasize issues related to the Far East region in terms of epidemiology, genetics and diagnostics, as well as typical complications and distinctive responses to treatments. Particular attention will be devoted to economic issues such as benefit versus price of drugs.

Judging by the positive and encouraging responses received, this meeting will uphold the CONy tradition of being an outstanding scientific and social event.

As always, there are several opportunities and industry-sponsored activities but we shall be happy to tailor suggestions to your needs.

We cordially invite you to join us as sponsors and partners of CONy 2011 in the beautiful city of Beijing, the capital of China, where ancient culture and modern civilization come together.

Sincerely,

Prof. Amos Korczyn | Prof. Wei Wei Zhang | Prof. Torbjorn Tomson
CONy co-Chairpersons

5th World Congress on Controversies in Neurology (CONy)
Beijing • China • October 13-16, 2011

CONY WORLD CONGRESS PROFILE

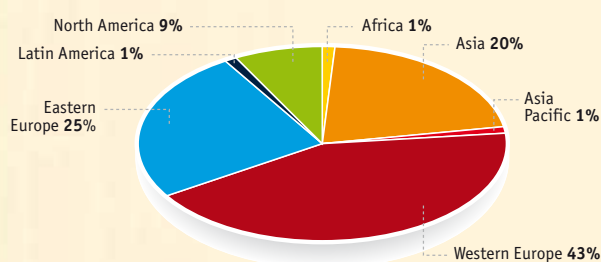

- Since its launch in 2007, CONy has become established as a unique meeting where physicians can meet with outstanding experts in all neurology fields, and be updated on the most pressing clinical questions of the day.
- CONy is a true educational experience that provides the audience insight into major changes in the rapidly evolving field of neurology and clinical neuroscience.
- The program at CONy Congresses is designed to provide an effective forum for discussing and debating unresolved issues by allowing ample time for speakers/audience discussion.
- CONy is the only Congress of its kind that focuses mainly on controversial issues in form of debates.
