

Prof. Dr. Eckart Schott is an associate professor of hepatology at the Charité Universitätsmedizin Berlin and the vice director of the Dept. of Hepatology and Gastroenterology. He studied medicine at the Ruprecht-Karls Universität Heidelberg and the Freie Universität Berlin, where he graduated in 1997. He received his medical training at the Dept. of Hepatology and Gastroenterology at the Charité Universitätsmedizin Berlin and is board certified in internal medicine and gastroenterology. He was also trained as an immunologist during a postdoctoral stay at Harvard Medical School and leads a research group focusing on the immune regulation in the liver. His habilitation was on the role of T-cells in the pathogenesis of autoimmune and viral liver diseases. He leads the hepatology group at the Department of Hepatology and Gastroenterology, his clinical focus being autoimmune and viral liver diseases as well as hepatocellular carcinoma. He is participating in many clinical studies on viral hepatitis as well as hepatocellular carcinoma.
